\* RAD = Radiator Model

Above dimension excludes exhaust outlet. Refer to appropriate ADV for detailed dimensions.

# **Generator Ratings (Prime)**

## **Marine Generator Set**

#### **Generator Features**

- Engine is Environmental Protection Agency (EPA) Tier III compliant (60 Hz model only)
- The unique Fast-Response <sup>™</sup> X excitation system delivers excellent voltage response and short-circuit capability using a rare-earth permanent magnet-excited alternator
- The brushless, rotating-field alternator has broadrange reconnectability
- Remote control connector
- Class H insulation
- Reconnectable voltage
- One- or three-phase reconnectable alternator
- Voltage regulation of  $\pm 0.5\%$
- Frequency regulation of 0.5%
- Heat exchanger cooled configuration includes a wet
  exhaust bend
- Keel cooled configuration includes a dry exhaust bend

#### **Optional Agency Type Approvals**

- Det Norske Veritas-Germanischer Lloyd (DNV-GL)
- China Classification Society (CCS)
- Lloyd's Register
- Bureau Veritas (BV)
- American Bureau of Shipping (ABS)

#### Engine Features

· One-side serviceability of fuel system, lubrication system, and air cleaner

14.3 (3.8)

10.6 (2.8)

- Low oil pressure cutout
- High water temperature cutout

25%

- · Loss of coolant cutout
- Overcrank cutout
- Belt guard
- Optional digital gauge
- Disposable oil filter
- Extended oil drain
- PTO options: 12- or 24-volt electric clutch

#### **Controller Features**

- A graphical display and pushbutton/rotary selector dial provide easy, local data access.
- Measurements are selectable in metric or English units. •
- The controller supports Modbus® protocol with serial bus (RS-485) • or Ethernet networks.
- Scrolling display shows critical data at a glance.
- Graphical display of power metering (kW, kVA, V, I, PF, and VAR).
- Integrated hybrid voltage regulator providing ±0.5% regulation.
- Built-in alternator thermal overload protection.

Modbus® is a registered trademark of Schneider Electric.

## Decision-Maker® 3500 Paralleling Controller

Provides advanced control, system monitoring, and system diagnostics for optimum performance and compatibility. The Decision-Maker<sup>®</sup> 3500 controller uses a patented hybrid voltage regulator and unique software logic to manage alternator thermal overload protection features normally requiring additional hardware. Additional features include:

- AC Output Voltage Regulator Adjustment. The voltage adjustment provides a maximum adjustment of ±10% of the system voltage.
- Alarm Silence. The controller can be set up to silence the alarm horn only when in the AUTO mode for NFPA-110 application or Always for user convenience.
- Alternator Protection. The controller provides generator set overload and short circuit protection matched to each alternator for the particular voltage/phase configuration.
- Automatic Restart. The controller automatic restart feature initiates the start routine and recrank after a failed start attempt.
- Cyclic Cranking. The controller has programmable cyclic cranking.
- ECM Diagnostics. The controller displays engine ECM fault code descriptions to help in engine troubleshooting.
- Engine Start Aid. The configurable starting aid feature provides customized control for an optional engine starting aid.
- Event Logging. The controller keeps a record (up to 1000 entries) for warning and shutdown faults. This fault information becomes a stored record of system events and can be reset.
- Historical Data Logging. Total number of successful starts of the generator is recorded and displayed.
- Integrated Hybrid Voltage Regulator. The voltage regulator provides ± 0.5% no-load to full-load RMS voltage regulation with three-phase sensing.
- Lamp Test. Press the alarm silence/lamp test button to verify functionality of the indicator lights.
- LCD Display. Adjustable contrast for improving visibility.
- Measurement Units. The controller provides selection of English or metric displays.
- **Power Metering.** Controller graphical display provides voltage, current, power factor, kW, kVA, and kVAR.
- Programming Access (USB). Provides software upgrades and diagnostics with PC software tools.
- Remote Reset. The remote reset function supports acknowledging and resetting faults and allows restarting of the generator set without going to the master control switch off/reset position.
- Run Time Hourmeter. The generator set run time is displayed.
- Time Delay Engine Cooldown (TDEC). The TDEC provides a time delay before the generator set shuts down.
- **Time Delay Engine Start (TDES).** The TDES provides a time delay before the generator set starts.
- Voltage Selection Menu. This menu provides the capability to switch the generator output voltage. NOTE: Generator set output leads may require reconnection.
- Paralleling Functions:
  - Bus sensing
  - First on logic
  - Synchronizing
- Communication based isochronous load sharing
- Droop load sharing
- · External controlled load sharing via analog bias signals

# **Alternator Specifications**

| Voltage regulator   | Solid state, volts/Hz  |  |
| Insulation: NEMA MG1  |  |  |
| Material  | Class H  |  |
| Temperature rise  | 115°C  |  |
| Bearing: number, type   | 1, sealed  |  |
| Coupling  | Flexible disc  |  |
| Amortisseur windings  | Full   |  |
| Voltage regulation, no load to full load  | $\pm 0.5\%$  |  |
| One-step load acceptance per NFPA 110<br>Peak motor starting kVA:<br>480 V, 380 V 4S12X (12 lead) | 100% of rating<br>(35% dip for voltages below)<br>480 (60 Hz), 380 (50 Hz) |  |

#### Alternator Features

- NEMA MG1, IEEE, and ANSI standards compliance for temperature rise and motor starting.
- Capable of sustained line-to-neutral short circuit current of up to 300% of the rated current for up to 2 seconds. Capable of sustained short circuit current of up to 300% of the rated current for up to 10 seconds for 3 phase connections. (IEC 60092-301 short-circuit performance.)
- Sustained short-circuit current enabling downstream circuit breakers to trip without collapsing the alternator field.
- Self-ventilated and dripproof construction.
- Vacuum-impregnated windings with epoxy varnish for dependability and long life.
- Superior voltage waveform from a two-thirds pitch stator and skewed rotor.

#### **Optional Accessories**

- Circuit breakers
- Remote digital display
- Remote monitoring, start/stop panel with wiring harness for connection to the generator controller
- Duplex fuel filter
- Siphon break
- · Remote connection/extension harness
- Oil level indicator (high/low)
- Low coolant level indicator
