# **Marine Generator Set**

#### **Generator Features**

- Engine is Environmental Protection Agency (EPA) Marine Tier III compliant (60 Hz model only)
- Superior Kohler Fast-Response® PMG excitation system
- Remote control connector
- Class H insulation •
- Reconnectable voltage
- One- or three-phase reconnectable alternator •
- Voltage regulation of 2%
- Frequency regulation of 0.5% •

#### **Optional Accessories**

- Sound Shield
- Remote digital display
- Isolated ground system (12- or 24-volt), standard
- Circuit breakers

## **Controller Features**

- A graphical display and pushbutton/rotary selector dial provide easy, local data access.
- Measurements are selectable in metric or English units.
- The controller supports Modbus® protocol with serial bus (RS-485) • or Ethernet networks.
- Scrolling display shows critical data at a glance.
- Graphical display of power metering (kW, kVA, V, I, PF, and VAR).
- Integrated hybrid voltage regulator providing ±0.5% regulation.
- Built-in alternator thermal overload protection. •

## Decision-Maker® 3500 Paralleling Controller

Provides advanced control, system monitoring, and system diagnostics for optimum performance and compatibility. The Decision-Maker<sup>®</sup> 3500 controller uses a patented hybrid voltage regulator and unique software logic to manage alternator thermal overload protection features normally requiring additional hardware. Additional features include:

- AC Output Voltage Regulator Adjustment. The voltage adjustment provides a maximum adjustment of ±10% of the system voltage.
- Alarm Silence. The controller can be set up to silence the alarm horn only when in the AUTO mode for NFPA-110 application or Always for user convenience.
- Alternator Protection. The controller provides generator set overload and short circuit protection matched to each alternator for the particular voltage/phase configuration.
- Automatic Restart. The controller automatic restart feature initiates the start routine and recrank after a failed start attempt.
- Cyclic Cranking. The controller has programmable cyclic cranking.
- ECM Diagnostics. The controller displays engine ECM fault code descriptions to help in engine troubleshooting.
- Engine Start Aid. The configurable starting aid feature provides customized control for an optional engine starting aid.
- Event Logging. The controller keeps a record (up to 1000 entries) for warning and shutdown faults. This fault information becomes a stored record of system events and can be reset.
- Historical Data Logging. Total number of successful starts of the generator is recorded and displayed.
- Integrated Hybrid Voltage Regulator. The voltage regulator provides ± 0.5% no-load to full-load RMS voltage regulation with three-phase sensing.
- Lamp Test. Press the alarm silence/lamp test button to verify functionality of the indicator lights.
- LCD Display. Adjustable contrast for improving visibility.
- Measurement Units. The controller provides selection of English or metric displays.
- Power Metering. Controller graphical display provides voltage, current, power factor, kW, kVA, and kVAR.
- Programming Access (USB). Provides software upgrades and diagnostics with PC software tools.
- Remote Reset. The remote reset function supports acknowledging and resetting faults and allows restarting of the generator set without going to the master control switch off/reset position.
- Run Time Hourmeter. The generator set run time is displayed.
- Time Delay Engine Cooldown (TDEC). The TDEC provides a time delay before the generator set shuts down.
- **Time Delay Engine Start (TDES).** The TDES provides a time delay before the generator set starts.
- Voltage Selection Menu. This menu provides the capability to switch the generator output voltage. NOTE: Generator set output leads may require reconnection.
- Paralleling Functions:
  - Bus sensing
  - First on logic
  - Synchronizing
- · Communication based isochronous load sharing
- Droop load sharing
- External controlled load sharing via analog bias signals

# **Alternator Specifications**

## **Alternator Specifications**

Specifications	Alternator
Manufacturer	Kohler
Туре	4-pole, rotating-field
Exciter type	Brushless, permanent-magnet, Fast-Response®
Number of leads	12, reconnectable
Voltage regulator	Solid state, volts/Hz
Insulation: NEMA MG1-1.66	
Material	Class H
Temperature rise	90°C
Bearing: number, type	1, sealed
Coupling	Flexible disc
Amortisseur windings	Full
Voltage regulation, no load to full load	2%
One-step load acceptance per NFPA 110 Peak motor starting kVA—4UA10	100% of rating 785

## **Alternator Features**

- The generator complies with NEMA, IEEE, and ANSI standards for temperature rise.
- The alternator uses a permanent-magnet, Fast-Response® excitation system.
- The alternator has a two-thirds pitch stator and skewed rotor.
- The generator has a solid-state, volts-per-hertz voltage regulator.
- The brushless, synchronous generator is broadrange and reconnectable.
- The windings are vacuum-impregnated with epoxy varnish for dependability and long life.
- Capable of sustained line-to-neutral short circuit current of up to 300% of the rated current for up to 2 seconds. Capable of sustained short circuit current of up to 300% of the rated current for up to 10 seconds for 3 phase connections. (IEC 60092-301 short-circuit performance.)

## **Optional Accessories**

- Modular sound shield manufactured with 5052-H32 aluminum in powder-coated Matterhorn white
- Circuit breakers
- · Remote digital display
- Remote monitoring, start/stop panel with wiring harness for connection to the generator controller
- Duplex fuel filter
- Siphon break
- · Remote connection/extension harness
- Oil level indicator (high/low)
- · Low coolant level indicator
- Isolated ground system (12- or 24-volt), standard
- Electric front clutch power takeoff (PTO) 12- or 24- volt
